Proven Premium

Better Design | Easy to Install. Corrosion Protection.

Omni is the foundation of TSE Brakes' premium spring brake chamber offering, combining proven all-steel construction, patented sealing technology, and full-immersion e-coat corrosion protection for longer service life.

Key Points

- OEM-preferred all-steel design
- Patented self-lubricating center seal
- Full-immersion e-coat corrosion protection
- Sealed and clamped configurations available
- Drum and Air Disc Brake applications

Best For

Customers seeking increased durability, longer service life, and premium corrosion protection.

Distributors, fleets, and technicians looking to reduce inventory, simplify installation, and improve service consistency without compromising chamber integrity.

Maximum Protection

Built for protection. Engineered to last.

UltraLife Plus is TSE Brakes' flagship spring brake chamber, engineered for maximum durability, corrosion resistance, and long-term performance in demanding service environments.

Key Points

- Proprietary Sealed When It Counts™ technology
- Urethane powder coating over proven e-coat base
- New spring design for longer service life
- Industry-leading corrosion resistance
- High-vibration mounting base
- Drum and Air Disc Brake applications

Best For

Customers demanding the longest service life, maximum corrosion protection, and premium performance in severe operating environments.
