STAINLESS STEEL CLEVIS PIN

While a "greasable" clevis pin might sound appealing, it's far from ideal in dirty environments. Here's why:

- Grease attracts abrasive contaminants, causing buildup during operation.
- These contaminants embed in the grease, accelerating wear and leading to premature failure.

THE BETTER CHOICE

Switch to our stainless steel clevis pin and eliminate the need for grease.

- Crafted from aviation-grade stainless steel for superior durability.
- Operates effectively without grease, minimizing maintenance.
- Outlasts traditional and "greasable" pins.
- Available as a complete clevis assembly or as a standalone pin.

Upgrade to a cleaner, more reliable solution with our stainless steel clevis pin.
