BRAKE ADJUSTER WITH STROKE INDICATOR

THE INDICATOR SLACK ADJUSTER CHARACTERISTICS

Built-In Stroke Indicator

The visual stroke indicator simplifies maintenance and ensures compliance with DOT requirements, assisting drivers and technicians in maintaining vehicle safety.

Durable Construction

Features an improved bushing for enhanced durability and a longer lifespan, even in demanding operating conditions.

Advanced Adjustment System

Equipped with a clutch adjustment assembly for extra-fine tuning, ensuring consistent brake performance and minimal wear.

Easy Installation

The single-pin design eliminates the need for templates, reducing installation errors and speeding up assembly.

KEY BENEFITS FOR OEM SUPPLIERS

Reliable Performance

Integral pressure relief valve and water egress caps protect critical components, ensuring long-term reliability and fewer warranty claims.

Streamlined Installation

Simplified design reduces installation time, improving efficiency on OEM production lines.

Enhanced Safety Compliance

Provides a straightforward solution to meet and exceed DOT safety standards, adding value to vehicle assemblies.

Comprehensive Warranty

Backed by a standard 7-year warranty, providing peace of mind for OEM partners and their customers.
